

[PocketDay Lists ReadMe – v1.45](#)

Requirements

PocketDay Lists requires a color BlackBerry device with OS version 4.0 or higher.

Installation Instructions

There are two ways to install PocketDay Lists; via the desktop manager when your BlackBerry is connected to your computer or downloading it Over the Air (OTA) using the BlackBerry's web browser. OTA downloads are recommended.

OTA install

Launch the native browser on your BlackBerry

Select Go To on the menu

Enter the following URL:

<http://www.pocketday.com/ota.htm>

You should see a screen prompting you to download PocketDay Lists

Select Download

When the download is complete select Reboot Now if prompted to do so.

You should now see the PocketDay Lists icon on the screen

Desktop Manager Install

Extract the PocketDay Lists files to a directory on your pc

Launch the BlackBerry desktop manager

Double click on the Application Loader

Follow the Wizard until you see the list of software on your BlackBerry

Click the Add button

Browse to the directory where the PocketDay Lists files are located

Highlight the pdlists.alx file and select open

Then click next and follow the instructions

Your BlackBerry will then reboot

You should now see the PocketDay Lists icon on the screen

Release Notes History

Version	Date	Notes
1.45	3/26/07	<ul style="list-style-type: none">• Added a Shortcut Key (C) to add a new item when a list is open• Added Shortcut Keys (U/D) to move lists Up and Down on the main screen• Increased the size of custom text fields to 2000 bytes just like the notes fields.• Changed Numeric fields so they accept the – sign and decimal point• Enhanced Search to support Notes and Category searches• Added a new Web Link Template and supporting menu items so that you can create a list of web links, by category.• Enhanced the menu so that if a list item has a URL, you can launch it directly from the menu without opening the item• Enhanced the BB Browser to allow a web address to be quickly added to a list• Show Contact Name when linked on item details screen• Corrected missing Save menu item when a contact was linked to a list item
